Product Description

Products Description

This product is the sodium salt of starch carboxymethyl produced by the action of starch and chloroacetic acid under alkaline conditions. White or almost white powder; Odourless; It is hygroscopic. Disperse into a viscous colloidal solution in water, insoluble in ethanol .

Product features

Sodium Starch Glycolate is widely used in oral pharmaceutical preparations as a disintegrator of capsules and tablets. It can be used in tablets with direct pressing or wet granulation. Through rapid water absorption, rapid and significant swelling is achieved, thus playing a disintegrating role.
